

ECONOMIC ANALYST

Energy, Economic and Environmental Consultants (E3c, Inc.) is accepting applications for an Economic Analyst specializing in natural resource and utility economics. The position is available immediately. This is a unique opportunity to become a long-term member of an established consulting practice.

Applicant must have minimum of Bachelor's Degree with at least three (3) years of related employment experience, or a Master's Degree (preferred) in Economics or related field to be considered. Prior research or employment in energy or natural resource-related practice, demonstrated proficiency with numerical analyses (e.g., Excel models), litigation support, and familiarity with large numerical database analyses (e.g., SAS, SPSS, DB2, Microsoft Access and Visual Basic) are desired, but not required. Proficiency with Microsoft Office software suite is required, and experience developing presentation graphics and report composition considered a plus. Candidate must be able to pass U.S. Department of Justice security check.

Candidates must possess superior math, writing and computer skills. Demonstrated excellence of work ethic, sophisticated communication skills, and exceptional organizational skills are distinguishing qualifications. The position demands a high-energy personality that projects a professional demeanor, is a self-starter, and is willing to accept diverse responsibilities with an inspired attitude. The ability to accept broad range of responsibilities and transition between wide ranging assignments in support of dynamic consulting practice are requisite skills for success in this position.

E3c, Inc. provides economic analyses and expert testimony primarily related to energy market regulation, natural resource valuation, natural resource policy and strategic planning for large end-use energy customers. We have experience in broad areas of natural resource economics applied to legal and capital investment decisions, with focus on energy, water resources, regulated and competitive market valuation, and commercial damages. Employment with E3c will provide diverse responsibilities, including research, writing, oral presentation, statistical and graphic analyses, and litigation support services. We offer a complete and competitive benefits package.

Interested candidates should submit a cover letter with resume, with transcripts and writing sample required if selected for an interview.
