1992-present **President, Energy, Economic and Environmental Consultants**
(*A Division of E3c, Inc.*) Albuquerque, New Mexico.

Association of consulting professionals focused on analysis of energy and environmental resource market issues. Expertise in broad array of natural resource analyses, including natural gas, natural gas liquids, oil, coal, renewable energy, air quality emissions compliance strategies, and energy information systems. Expert witness services on issues relating to natural gas and electric market regulation, market competition, economic damages, utility rates, renewable energy resources, natural resource valuation, lease and sales contracts, water resource issues, and other natural resource policy issues. Emphasis on integration of natural resource market information systems applications.

1985-1992 **Director, Economic, Statistical & Policy Analysis Division**
New Mexico State Land Office, State of New Mexico, Santa Fe, New Mexico.

Direction of research, resource management and policy analyses pertaining to diverse natural resource attributes of New Mexico state trust lands encompassing approximately nine million surface acres and thirteen million mineral rights acres. Supervisor of staff statistical and economic analysts engaged in natural resource management and leasing. Specific natural resource issues addressed:

Natural Gas — Interstate natural gas pipeline tariffs, international gas resource/transportation competition, competitive access to domestic natural gas markets, pipeline service comparability, natural gas transportation agreements, natural gas sales contracts, unconventional gas resource valuation/production incentives, natural gas processing plants and processing agreements, natural gas pricing issues, Clean Air Act and alternative fuel opportunities for natural gas resources.

Oil — Interstate oil pipeline regulations and tariffs, market pricing and valuation issues, secondary and tertiary recovery techniques and incentives, international and domestic oil pricing issues, and oil lease property reclamation.

Coal — Coal resource valuation, coal lease policy, coal market competition, transportation and lease development constraints.

Water — Regional water resource planning, water rights issues, resource development policy, competitive market valuation, water easement contract negotiations and export application litigation strategy.

Wilderness Land Policy — Inventory of wilderness land values and land exchange policy analysis.

Surface Resources — Establishment of grazing fees, exchange valuation, environmental damage remediation, and recreational/hunting access.

Responsibilities include various administrative and management issues relating royalty valuation policy, mineral audit management and strategy, natural resource market evaluations, lease term extension policy, revenue and fiscal policy management. Procurement manager, lead negotiator, management team and contract administration responsibilities for multi-agency oil and natural gas database design and development project (\$13 million contract, thirty-month project).

1979-1985 **Economist,** Bureau of Business and Economic Research, University of New Mexico, Albuquerque, New Mexico.

Direction and participation in numerous multi-disciplinary and analytical research projects. Topics investigated included: water rights markets and water resources planning; coal resources; employment, wage, construction and mining forecasting (by sector); general economic activities and conditions in New Mexico. Responsibilities include: research design, supervision, scheduling, budgeting, field interviews, computer modeling, writing and editing final reports of all research activities. Several private consulting engagements also taken, and courses taught as guest lecturer in both Economics Department and Law School during this period.

1977-1979 **Graduate Research Assistant,** Department of Economics, University of New Mexico, Albuquerque, New Mexico.

Responsible for multi-disciplinary research activities, draft and final report preparation, coordination of research activities among differing groups of researchers, and substitute teaching of economics courses. Research topics included water resources, recreation demand analysis, and the wrecker industry in New Mexico.
